

Windows 365

Cloud PC

Your Secure, Efficient & Scalable Cloud PC with Windows 365

accessible anywhere, on any
device, at any time

Now more than ever, organisations need to adopt working platforms that will enable them to transition seamlessly and swiftly between remote and in-person work environments, ensuring consistent user experience, performance, increased productivity, more flexibility, while still maintaining a high security posture.

Windows 365 Cloud PC offers you a highly flexible, secure, enterprise-proven cloud desktop solution, which ensures a personalised, scalable and consistent Windows desktop experience to your end-users, hosted on a Windows 365 service platform that combines the power of cloud and security, enabling the users to access all their apps and data from anywhere, on any device.

Your Windows PC in the Cloud –

More Adaptable, Resilient & Fully Managed by The Cloud Factory,
Supporting the Modern Workforce Needs and New Business Scenarios

How the Cloud PC Solution can Help Your Business

Simplified Setup & Management

Easily deploy and centrally manage your Cloud PCs in a unified console with Microsoft Endpoint Manager.

Enhanced Security & Compliance

Provide your end-users with Cloud PCs which are pre-configured with the right security & compliance features to prevent any potential leakage & misuse of your business-critical data.

Data & access are centralised in the cloud, not on devices.

Support Remote Working

Users can access their consistent Windows desktop experience from anywhere, on their choice of device, with secure access to apps & company resources.

Scale as needed

Meet the needs of your elastic workforce with a wide range of easy-to-configure computing options.

Predictable Pricing

From deploying your Cloud PCs, implementing the security baseline to supporting your end-users with our team of trained technicians, you shall benefit from a complete, high-end managed service with predictable per-user monthly pricing.

Windows 365 Cloud PC Managed Services Include

- ✔ **Licensing** - As a Microsoft CSP Direct Partner, our team will assess your use-case scenario of the Cloud PC solution and help you identify the right Windows 365 Enterprise plan by mapping user personas.
- ✔ **Setup & Deployment** - Rely upon our field experts who will setup and configure your Cloud PCs as per best-practices, aligned to your business requirements.
- ✔ **Security & Compliance Implementation** - Our team will ensure security of the endpoints & proper protection of your corporate data by pre-configuring the right security & compliance policies to your Cloud PCs, before allocating to users.
- ✔ **Training & User Adoption** - In-person / remote hands-on end-user training to drive successful adoption of the Cloud PC solution and enhance productivity.
- ✔ **Monitoring & Reporting** - Proactive monitoring of the Cloud PCs using appropriate dashboards and provide periodic endpoint performance reports.
- ✔ **User Support Help Desk** - Email & chat-based post-installation support, with industry-leading SLA.
